History of Changes

[RSS](#)

1. Version 0.8.3alpha2 (20040618)
- added paging for message display (JWK)

2. Version 0.8.2 (20040514)
- changed navigation look (MUF)
- improved search functionality: when navigating to a matching message, matched text is highlighted (JWK)

3. Version 0.8.1 (20040102)
- folder hierarchy display in navigation (JWK)
- contact management: added sorting functionality (JWK)
- added search functionality (JWK)

4. Version 0.8 (20040116)
- added contact (address) management (JWK)
- folders can now be created as mail folders or as parent folders (JWK)
- changed folder navigation to frameless, therefore improved usability for refreshing (JWK)
- technical improvements: migrated to Cocoon 2.1.3, increased genericity of sitemap, xsp files and xsl files (JWK)

5. Version 0.7 (20031212)
- added some level of support for subfolders (subfolders are displayed on the same level as ordinary folders, but with their complete name, that means including the path) (JWK)
- additional navigation after replying (JWK)
- set reply flag when a successful reply was sent (JWK)
- improved timeout page. Generate link to login context dynamically so it works no matter what the context is where timeout occurs. (JWK)
- repaired PDF formatting of message body (JWK)
- added customization feature for reference separator (such as, what text gets used when replying) (JWK)

6. Version 0.7beta4 (20031128)

- new navigation (JWK)
- improved display and usability (JWK)
- production testing and bug-fixes for Tomcat 4 (JWK)

7. Version 0.6 ()

- new graphics (JWK)
- added "reply-all" feature (JWK)
- added "forward as attachment" feature (JWK)
- improved handling of multipart attachments (JWK)

8. Version 0.5final (20030224)

- added demo user functionality (userid is configured in sitemap) (JWK)
- improved error handling in case user is setup strangely on system (JWK)
- implementation of own persistence manager to avoid awt references, so that configuration persistence will work on server-only (= no X) systems (JWK)
- source organization: simplification and major clean-up, with goal of easier CVS manipulation (JWK)
- added "initial folder" user configuration feature (JWK)
- added user signature configuration feature (JWK)

9. Version 0.4 (2002)

- improved formatting of text when replying to a message (JWK)
- build mechanism: added automated insertion of version number into documentation (JWK)
- Added link to return to original message after replying / forwarding a message (JWK)
- Added message viewing as PDF functionality (JWK)

10. Version 0.3 (2002)

- Migration to Cocoon 2.0.4 and newest JavaMail API. (JWK)

11. Version 0.2 beta (2002)

- First public release, based on Cocoon 2.0.2 (JWK)
